Summary

Data Analyst Engineer with hands-on experience in **data analysis, data cleaning, data validation, exploratory data analysis (EDA), SQL querying, reporting, dashboard development, and process automation**. Proficient in **Python, Pandas, NumPy, SQL, Excel, Power BI, and data visualization**, with experience developing automated Excel workflows, pipeline inspection analytics, customer analytics, and business reporting solutions. Proven ability to **transform raw and operational data into actionable insights, identify trends and anomalies, automate repetitive tasks, improve reporting accuracy, and streamline data-driven business processes**.

Skills

Programming Languages: Python, SQL
Data Analysis: Pandas, NumPy, Excel, Data Cleaning, Data Validation, EDA
Visualization: Power BI, Matplotlib
Databases: SQL, SQLite
Tools: Git, GitHub, VS Code, Jupyter
Other Technologies: Tkinter, CustomTkinter, OpenPyXL, ReportLab, Scikit-learn, Dashboard Development, Process Automation

Experience

Data Analyst Engineer | Indian Oil Corporation Limited (IOCL), Faridabad | July 2025 – Present

- **Automated Excel and Python-based data-processing workflows**, reducing manual data-processing effort by **~70%** and improving overall reporting efficiency.
- **Optimized data validation and matching workflows** for pipeline inspection, MFL, and Pipetally datasets, reducing manual verification time by **~60%**.
- **Developed automated reporting and calculation workflows** using Python, Pandas, NumPy, and OpenPyXL, reducing report preparation time by **~50%**.
- **Improved data quality and consistency by ~30%** through automated validation, error checking, anomaly identification, and structured data-processing workflows.
- **Streamlined pipeline inspection analytics** by automating dataset matching, feature-based calculations, and report generation, enabling faster analysis of operational data.
- **Developed analytical dashboards and reporting solutions** that reduced manual reporting activities by **~40%** and provided clearer operational insights for data review.
- **Processed and analyzed large Excel, CSV, MFL, and Pipetally datasets** using Python and SQL, improving data accessibility and supporting faster decision-making.

Education

B.Tech. - Computer Science & Engineering 2022 - 2025
KCC Institute of Technology and Management, Greater Noida, UP

Diploma - Computer Science & Engineering 2019 - 2022
Government Polytechnic College, Bijnor, UP

Certification

- Certificate of Completion in Python.
- Certificate of Completion in SQL.
- 4 Weeks Training Certificate in Python

Projects

Telecom Churn Analysis Dashboard

- **Built a desktop analytics dashboard** using Python, Tkinter, Pandas, and Scikit-learn for customer churn analysis.
- **Implemented data upload, analysis, prediction, risk-customer identification, retention insights, and Excel export** workflows.
- **Used Random Forest-based prediction** to support customer-risk analysis.

Banking Management System

- **Developed a Python and SQL-based banking management application** for customer account and transaction management.
- **Designed and integrated a SQL database** to store customer, account, and transaction records with reliable data retrieval and updates.
- **Implemented CRUD operations along with deposit, withdrawal, balance management, and transaction-history** workflows.
- **Built a desktop interface integrated with the database** for efficient customer and banking operations.
- **Implemented data validation and database-driven processing** to improve data accuracy and maintain consistent transaction records.
